Lunar Calendar 2023-2024    Year of the Hare

**The lunar calendar, a daily companion!**

In addition to the inspiration it offers through the beauty of the collage and the oracle, specific to each month, the CREEA lunar calendar gives us a wealth of information related to the Moon's cycles of waxing and waning and its movement in the wheel of the zodiac.

This information allows us to better choose the right moments for the important activities of our daily life, whether it be rituals, projects to start, gardening , body care, etc.

To better understand the possibilities offered by this calendar, we invite you to watch the short explanatory video that you will find when visiting: [unispourprosperer.com/post/guide-calendrier-lunaire](https://unispourprosperer.com/post/guide-calendrier-lunaire)

In the delight of celebrating the Moon with you!
